PROFILE INFO

I am a passionate and results-driven web developer with deep expertise in JavaScript and its leading frameworks, including Next.js, React, React Native, and Express.js. My development approach is rooted in Agile methodologies, ensuring that projects are delivered with both efficiency and exceptional quality. I thrive on tackling complex challenges and constantly seek to broaden my knowledge through learning new design patterns and programming languages in my spare time. Eager to collaborate with like-minded professionals, I am looking to join a larger team where I can contribute my skills, share ideas, and help build innovative solutions.

EDUCATIONAL HISTORY

BACHELOR OF Computer Engineering

The Hong Kong University of Science and Technology
2019-2022

Associate Degree OF Information Systems Development (Distinction)

City University of Hong Kong
2017-2019

WORK EXPERIENCE

Full-stack developer

Personify Ltd, Leeds, UK 2022 - Present

- Designed and enhanced user interfaces for management systems, ensuring intuitive and visually appealing experiences
- Built responsive web and mobile applications using JavaScript and frameworks like Next.js and React Native
- Integrated cloud services such as AWS S3, Firebase, Stripe, and Calendly to extend application functionality
- Designed and normalized PostgreSQL databases to support scalable and efficient data storage
- Implemented CI/CD pipelines in GitLab to streamline testing and deployment processes
- Developed custom modules for Microsoft Business Central to tailor solutions for client needs
- Created adaptive email templates that display consistently across various email clients
- Solved complex problems and automated processes through innovative coding solutions

Web developer (Internship)

NM Optim Limited, Hong Kong Jun 2021 - Dec 2021

- Designed and developed a responsive homepage in WordPress using custom modules
- Integrated Elementor to create a functional and engaging user interface
